COMPLIANCE TECHNOLOGIES, INC
Environmental, Health & Safety Consultants

"When clients come to us with a severe pain from a regulatory perspective, we try to make that go away so they can focus on their job of manufacturing a product, providing a service and being profitable. The Village of Cuyahoga Heights has been very supportive and continues to make us feel we're a valued member of the business community." — Stephen J. Kovatch, President

Founded in 1990, Compliance Technologies, Inc. consists of a team of proven environmental scientists, engineers and safety specialists whose years of experience can provide companies with wide-ranging and cost-effective services to assist with the layers of regulations governing today's business activities.

Company personnel possess specialties in the media of air and water quality, hazardous and non-hazardous wastes, site remediation, employee training, property transactions, health and safety, asbestos and mold services, and project management. Our wealth of experience in all of these areas is what makes CTI the right choice to manage a company's risks.

Your Compliance Is Our Goal

What does this mean to our clients? It means that Compliance Technologies will provide expert services in environmental, health, and safety to rapidly meet our customer's specific needs in order for them to adhere to regulatory requirements. It means that we intend to provide these services over the long term in a beneficial relationship, to clients large or small, and to do so in a cost-effective manner.

Compliance Technologies will provide high-quality services through capable and qualified personnel, whose background experience includes regulatory agencies, consulting firms, hazardous waste treatment facilities, transportation companies, and other private industry. Our personnel, individually and as a team, will help solve compliance problems and provide the needed tools to keep the enterprise in compliance.

CTI strives to keep its clients up-to-date with developments within the environmental, health, and safety regulatory fields. Sign-up online to receive our CTI Newsletter and notices of upcoming events.

Consulting Services

Compliance Technologies provides clients with insight into their environmental, health, and safety risks through programs developed and expanded since its founding in 1990. Maintaining compliance with the ever-changing regulatory rules of EPA, OSHA, and DOT is a difficult and continuous undertaking and CTI has the personnel, experience, and service programs to prevent or resolve non-compliant activities within client operations.

Asbestos and Mold Services

Employee Training

Compliance with EHS regulations does not end with the completion of management plans. Once plans are in place, companies and their employees bear the responsibility of executing those plans in a manner that maintains facility compliance on a daily basis. Our employee training services provide customized classes to explain confusing EPA, OSHA, and DOT regulations. The additional knowledge and insight gained by employees increases overall safety while reducing costly mistakes. Employees trained and tested by CTI receive certificates for facility record keeping.
